

Dear cryo-colleague,

As you will have noticed the European Cryogenics Days this year will be a fully online event on November 3rd and 4th. The program is still under construction but we intend to open the event with the General Meeting of the CSE followed by invited plenary talks filling the morning of November 3rd. Also in the morning of November 4th, we will have plenary talks. The afternoons will be filled with posters and exhibitions. The platform we will be using is Whova (also used by CEC/ICMC).

With this format of invited talks brought to you by key players in the field, combined with poster sessions (addressing the technologies which are being studied) and exhibitions (addressing the already available solutions) we would like to provide to our members and other interested people a discussion platform concerning the increasing number of cryogenic applications with their future needs and available solutions now and in the future.

Confirmed invited talks at this moment:

Holger Kollmus (GSI): Progress in FAIR cryogenics

Bart Beulen (CryoSol): Cryo-Electron Microscopy

Steffen Grohmann (KIT): Cryogenics in the Einstein Telescope

Huayong Zhao (Loughborough University): Can cryogenic fluids be applied in transportation?

Alexander Brinkman (University of Twente): Developments in Quantum Technology

Alexander Regnat (Kiutra): Magnetic refrigeration for Quantum Applications

Attendance fee: CSE members: free; non-CSE members 20 euro via Paypal. This 20 euro may also cover a CSE membership for the remaining period of 2021 (in the ECD registration procedure, you will need to confirm the request to become a member)

Exhibition: We invite our corporate members to register for the online exhibition. The exhibition will be free of charge for CSE corporate members. Companies and institutes that are not (yet) corporate members of the CSE will be charged 400 euros. Also here, the company or institute can become a corporate member of CSE at no further charge for 2021 (and again, request to be confirmed in the ECD registration procedure). Please contact Beth Evans for further information and pre-registration as an exhibitor: beth.evans@ukaea.uk

Posters:

We intend to have online poster sessions in the afternoons with ample opportunity for interaction. If you are interested to present a poster, contact Lionel Duband for further information and for submitting your abstract, max 200 words: lionel.duband@cea.fr

Further information:

General: Marcel ter Brake: chairman@cryoeurope.org

Financial and internet platform issues: treasurer@cryoeurope.org

Please forward this announcement to contacts in your network that may be interested.

We hope to welcome you on November 3rd and 4th!

CSE Board
